Personal Statement

I am Interventional Cardiologist with over 10 years of clinical and academic experience in the field of Interventional Cardiovascular Medicine. I have been working for over a decade with world renowned authorities in Interventional Cardiology: Prof. Patrick W. Serruys, MD, PhD from Erasmus University in Rotterdam, Prof. Spencer B. King III from Emory University in Atlanta, Georgia the United States of America and Prof. Shao-Liang Chen from Nanjing Medical University in Nanjing, China.

I am currently employed by Metropolitan General Hospital as Interventional Cardiologist following intense training in Interventional Cardiology at the legendary catheterization laboratory of Nanjing First Hospital in Nanjing, China aka “The Spencer B. King III Cath Lab”. The facility was a center of excellence for coronary interventions specializing in complex coronary interventions such as complex bifurcations and chronic total occlusions. It is considered among the leading catheterization laboratories worldwide with an average volume of over 4,000/year. My daily practice is focusing in treating patients with complex left main bifurcations, non-left main bifurcations and chronic total occlusions.

I am an established clinical researcher in the field of Interventional Cardiology with over 2,600 citations and h-index of 30. I am invited faculty in over 10 scientific conferences annually worldwide to deliver state-of-the-art educational lectures. My research interests are focused in investigating novel approaches to the treatment of complex coronary disease, novel platforms such as bioresorbable scaffolds for the treatment of significant coronary stenoses and the impact of imaging-guided coronary interventions in clinical outcomes. My most recent publication was the ULTIMATE randomized clinical trial, which showed that patients treated with intravascular ultrasound guidance have significantly better clinical outcomes compared to those guided angiographically.

For over a decade I have been an asset to each institution I was representing. I have strong work ethics, passion for hard work, compassion in patient care, robust international network and confidence in my abilities.
